The Town of New Milford has scheduled different types of road work for the 2016 construction season.

Planned paving operations (mill and patch) on segments of the following roads in the summer of 2016 will begin as part of our road maintenance plan. This work is done in stages and will begin 7/18/2016 for approximately two weeks.

Road List (may change): Sections of Candlewood Lake Rd. South, Hine Hill Rd, Hipp Rd, Candlewood Lake Rd North and Cherniske Rd.

In addition, chip sealing will begin on 8/1/2016 and will continue for approximately 10 days. On these days please drive slowly and allow extra time. Consider the use of alternate routes and expect delays. The schedule is weather permitting, and may be subject to change. Loose Gravel signs will be used to indicate a change in road condition. Chip seal is an effective low cost pavement preservation technique. Loose Stone will be swept 4-5 business days after application.

Road List (may change): Aspetuck Ridge Rd, Boardman Rd, Cherniske Rd, Cross Rd, Erickson Rd, Housatonic Ave, Larson Rd, Littlefield Rd, Merryall Rd, Old Town Park Rd, Peagler Hill Rd, Ridge Rd, Sullivan Rd and West Meeting House Rd.

The Department of Public Works would like to thank you for your patience and understanding during this projects' construction period and for allowing us the opportunity to improve the Town's infrastructure. As always, all these construction techniques are weather dependent.
